PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student (7th Semester) with hands-on experience in Python, data analysis, and machine learning. Built 3 end-to-end ML projects, including recommendation systems, predictive classification models, and a RAG-based video search system, and currently learning Agentic AI. Strong foundation in data preprocessing, SQL, and analytical problem-solving, seeking internship or fresher roles in Data Science, Data Analytics, and Python Development.

EDUCATION

IES College of Technology, Bhopal — Currently in 7th Semester
B.Tech: Computer Science Engineering | CGPA: 6.86

Bihar Board — 2022
12th (Higher Secondary) | 58.4%

Bihar Board — 2020
10th (Secondary) | 69%

PROJECTS

Internship Recommendation System | GitHub — *Team Project*
- Built a smart internship recommendation platform using Python, AI-assisted logic, and web technologies.
- Helped students discover relevant internship opportunities based on skills, interests, and career preferences.
- Contributed to project planning, feature implementation, and collaborative development workflows with Git.

Heart Disease Prediction | GitHub — *Individual Project*
- Built a classification model to predict heart disease from 14 clinical attributes, including age, cholesterol, blood pressure and chest pain type, using the UCI Heart Disease dataset.
- Applied data preprocessing and classification techniques with Pandas, NumPy and Scikit-learn to identify key risk factors from patient health records.

Course Video Topic Search (RAG) | GitHub — *Individual Project*
- Built a RAG-based system over course video lectures using Python and LLMs to find where each topic is taught.
- Implemented a search function that returns the relevant video for any topic query, making revision and topic lookup faster.

SKILLS

- Python
- SQL
- **Advanced Excel**
- Probability & Statistics
- Git & GitHub
- NumPy & Pandas
- Matplotlib & Seaborn
- Machine Learning & Algorithms
- Deep Learning
- Conda / VS Code
- Large Language Models (LLMs)
- RAG-based AI Systems
- Agentic AI (Learning)
- HTML & CSS

CERTIFICATIONS

- Data Science by Code with Harry (Online)
- Hackathon Participation Certificate: TECH SAGEATHON 2K26 (National Level) — 2026
- Certificate of Participation: BGI Hackathon 2026, Vision 2047 | Viksit Bharat — 2026

ACHIEVEMENTS

- Competed in TECH SAGEATHON 2K26, a national-level hackathon organized by Sagar Institute of Research and Technology, Bhopal, showing teamwork, problem solving and leadership.
- Participated in BGI Hackathon 2026 by Bansal Group of Institutes, Bhopal, on Agriculture, FoodTech & Rural Innovation, a national event with 600+ teams.
